*% DV = Percent Daily Value **Daily Value not established

OTHER INGREDIENTS: Vegetable capsule (hydroxypropyl methylcellulose, water), rice flour, silicon dioxide.

FREE FROM: Soy, Dairy, Gluten, other common allergens.

UROX[®] +

Bladder Support

UROX[®]+ is an exciting new treatment that supports overall bladder health and control for both men and women. Crafted from a proprietary blend of three gentle herbs, UROX+ can minimize feelings of urgency, reduce the frequency of urination, and even lessen or end leaks and other accidents.

UROX[®]+, Biote's premier nutraceutical for bladder health, contains a proprietary blend of three gentle herbs traditionally used for bladder health: the horsetail plant, *Lindera aggregata* root, and Cratevox[™] Three-Leaf Caper. In this specific, patented combination of these three herbs, they work to improve bladder tone and pelvic floor muscles.

- **The stem of the horsetail plant** contains a high level of silicon. Silicon helps produce collagen that builds the bladder's connective tissue, supporting overall bladder health.
- **Lindera**, widely used in Chinese and Japanese medicine for bladder and kidney support for hundreds of years, improves the muscle that is the major control for emptying the bladder.
- **And Cratevox**, prized in India for its many healing properties since at least 800 BC, supports bladder, kidney, and prostate health.

UROX[®]+ is well tolerated and safe to take long-term. It's a great option for postpartum women, young women who do intense physical exercise, and menopausal or post-menopausal women. In addition, UROX[®]+ can benefit men with bladder problems, many of which are inaccurately assumed to result from prostate problems. †
