PICO GENESIS

What is PICO Genesis?

PICO Genesis is the latest aesthetic treatment to improve and maintain your skin's natural glow. Eliminate unwanted freckles, sun spots, and uneven skin tone, and reveal a lighter, brighter, and more even appearance in a series of two to three treatments.

How does the treatment work?

PICO Genesis uses gentle non-thermal pulses of laser light to target unwanted pigment and remodel the upper layers of the skin. Over time, the pigmentation will gradually disappear, enhancing your natural glow.

What areas can be treated?

PICO Genesis treatments are ideal for the face, hands and other areas of the body with noticeable signs of sun damage and uneven skin tone.

What can I expect during a treatment?

As laser energy is delivered to the skin, you'll feel a sensation that patients often compare to an electric rain. While most patients do not find the treatment uncomfortable, your PICO Genesis provider may apply a topical anesthetic to enhance your experience.

Following the treatment, your PICO Genesis provider may recommend additional post-treatment care to enhance your treatment results.

What are the possible side effects?

Most patients experience mild redness immediately following the treatment. These side effects are temporary and typically resolve within 24 hours. Over the course of a few days, the treated sun spots and freckles will become darker and flake off as they heal, revealing a new, glowing complexion.

How many treatments are required?

A series of two to three PICO Genesis treatments are recommended to achieve an optimal outcome. Ongoing maintenance treatments are encouraged to sustain results over time. Your PICO Genesis provider will discuss a treatment plan during your consultation.

Is PICO Genesis right for me?

If you have unwanted pigment or uneven skin tone, then PICO Genesis may be a great treatment option for you. Speak to your provider today to learn more about the PICO Genesis treatment.
